Subject: Pedro Point Neighborhood Sewer Maintenance and Improvements Work

Dear Residents,

The purpose of this letter is to inform you of a sewer maintenance and improvements project that will be conducted in your neighborhood, with construction starting in spring of 2018. This project is part of the City's overall sewer improvements that are identified in the City's sewer master plan. The Project is formally called *Collection System Rehabilitation and Replacement Projects Pedro Point (C031A)*. The project is currently in the design phase.

The first step in this design phase is to confirm locations of the existing utilities and their proximity to the sanitary sewer being replaced. We anticipate that utility locating will begin in June or July. The utilities will be located by using an excavation technique that makes a small hole (4-inch diameter) in the street and vacuuming the soil from the hole until the utility is exposed. The excavated soil is then discharged into a tank on the truck for later use as backfill for the hole. The hole made by the machine will be backfilled and patched immediately, and there will be no impact to the surrounding ground.

The City is in the process of scheduling a series of informational meetings to describe the overall project in more detail including the project schedule, project benefits, and the impacts to residents during project construction. You will soon be receiving an letter about the schedule and location of the informational meetings.

Kind regards,

Brian Martinez Sr.
