PRESS RELEASE

May 16, 2019

WET WEATHER EQUALIZATION BASIN PIPE LINE CONSTRUCTION

FOR IMMEDIATE RELEASE (Pacifica, CA) – The City’s contractor, Sierra Mountain Construction, Inc., has been constructing a new Wet Weather Equalization Basin (EQ Basin), which will mitigate storm-related sanitary sewer overflows in Linda Mar Valley. The EQ Basin is located underneath the east parking lot of the Community Center.

As part of the project, a 28 inch diameter pipeline is being constructed in the Linda Mar neighborhood to divert the excess wastewater into the new EQ Basin, and beginning May 20th, De Solo Drive between Linda Mar Blvd and Arguello Blvd will be closed between 9am to 4pm as crews work to lay that section of the pipeline (see picture on the next page for more details). The road is expected to be closed for numerous weeks during the indicated work hours until the project is complete. It will reopen for normal use each day after work hours. During closures, traffic through Linda Mar will be reduced to a single lane as needed and alternate routes are encouraged. Slow speeds will be enforced. The City will provide more detailed timeline information as the project progresses.

The City appreciates everyone’s patience and cooperation for any inconveniences caused by construction activities as we strive to improve human health and the environment in Pacifica. Sierra Mountain Construction, Inc. will be applying safety and traffic coordination measures to minimize inconveniences as much as possible. Please contact the Public Works Department at (650) 738-4660 if you have any questions or comments.
