

TYGARJAS TWYRLS BIGSTYCK

Thank you for considering me to represent you.

I hold two undergraduate degrees from Tulane University. I have spent the last year serving as a city planning commissioner. I've served the board of directors for the Pacifica Resource Center for the last five years, the last two years of which as the board's Vice President. I served on the rent advisory task force four years ago. Mostly, you probably know me from selling you food at the supermarket for the last fourteen years or so. I've lived in Pacifica my entire life.

I'd like to foster a community in which folks can grow up and afford to continue living where their home has always been. I want to focus on getting the sea wall built, fixing roads, and attracting business. If anything is going to get done, we have to do it together.

The repercussions for turning great ideas into bad policies have a big impact on a community our size. Elect me, and you will have a loud voice on council advocating for seeing past short-term victories through to long-term gains. You will have a loud voice insisting that we listen to each other, and build this community together.
